

E-Commerce Sales Analytics

Overview

This project analyzes mock e-commerce sales data using SQL and Power BI. The goal is to uncover business insights such as revenue trends, customer behavior, and product performance.

The project was implemented using:

- **MySQL Workbench** for data storage and SQL querying
- **Power BI Desktop** for data visualization

Business Questions & Insights

Each question below includes:

- A description of the insight
- The Power BI visual used
- The equivalent SQL query

How is Revenue Trending over Time ?

Insight: Monthly Revenue trend helps understand sales performance.

PowerBI:

How is Revenue Trending over Time ?

Insight: Monthly Revenue trend helps understand sales performance.

SQL:

```
SELECT DATE_FORMAT(o.order_date, '%Y-%m') AS  
SUM(oi.price * oi.quantity) AS total_revenue  
FROM orders o  
JOIN order_items oi ON o.order_id = oi.order_id
```

	month	total_revenue
▶	2024-05	3821660.30
